This year, look forward to spring!

A.Vogel Allergy Relief products are made from a carefully chosen selection of plants that act on allergy symptoms while at the same time strengthening the body's defenses against allergens. This means fewer symptoms now and fewer allergies in the long term.

In a clinical study* of nearly 200 allergy sufferers, **88.5% of participants saw an improvement** in their symptoms using A.Vogel Allergy Relief.

57% reported that their symptoms had completely or nearly completely disappeared. **Best of all, none of the test subjects reported any side effects.**

For best results, start taking from 4 to 6 weeks before the onset of allergy season.

Allergy Relief Tablets and Drops

(formerly Pollinosan)

- Prevents and relieves allergy symptoms – itchy eyes, sneezing, runny nose
- Promotes normalization of the immune system, to break the allergy cycle
- Helps reduce the incidence and severity of allergic reactions over time

Allergy Relief Nasal Spray

(formerly Pollinosan)

- Fast relief of symptoms such as congestion, sneezing and runny nose
- Will not irritate the sensitive lining of the nose
- Will not cause rebound congestion when discontinued

You may also want to try...

Stinging Nettle

- Promotes the elimination of toxins that can cause allergies
- Relieves inflammation
- Relieves allergic rhinitis

Molkosan

- To neutralize body acidity: too much acidity is a key factor in allergic reaction and inflammation
