### THE 3 A.VOGEL GOLDEN RULES

**1 Fresh Herb Remedies**  
Why do we insist on using freshly harvested herbs in our remedies? The answer is quite simple—it is because they make the most effective medicines. It will come as no surprise to you that the amount of active substances in herbal remedies can differ greatly—250 mg of a herb from one manufacturer may contain more actives than 500 mg from another. Research has shown that herbal remedies made from freshly harvested herbs consistently contain higher levels of active substances than those made from dried herbs.

**2 Leading the Way in Herbal Research**  
Alfred Vogel pioneered research in natural remedies. We are proud to continue his groundbreaking work with innovative research projects on our farms, laboratories and in clinical trials. With herbal remedies from A.Vogel you are choosing products researched in an ethical manner; Products made by Nature and proven by Science.

**3 Cultivation with a Conscience**  
Alfred Vogel had a great respect for nature, recognizing the dangers that man could inflict on the natural world as well as on himself. His ethics continue to have a profound influence on us. We stand firmly against the exploitation and depletion of wild plants in nature and ensure that our herbal remedies are produced without harming the environment.
